

Input (Mattermost Task)

Instruction

"I just got our OSWorld eval SR result (35.5). Reply to my own earlier message in AI-Research on mattermost with the result."

Unindexed full-text search

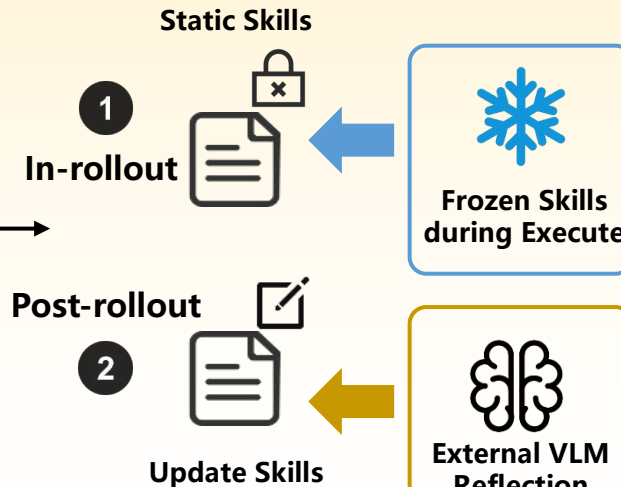

Existing Skill-based Methods

Unstructured Single-file Skill (e.g., long text)

Skill.md

Open Mattermost and navigate to the AI-Research channel, locate your own earlier message about the eval suite, long-press it to trigger the context menu and tap Reply, then type "35.5" in the threaded reply input field and tap Send.

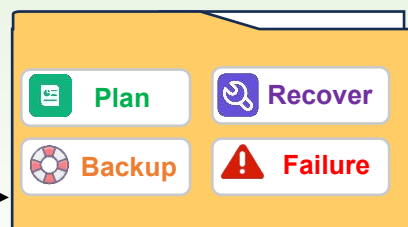

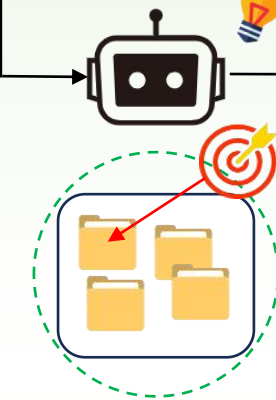

Limitations

- ✗ Unstructured skills: Hard to maintain and edit
- ✗ External VLM reflect: Costs and latency.
- ✗ One-shot synthesis: Cannot adapt during execution
- ✗ Full-text retrieval: Inefficient & Imprecise

EvoSkill-GUI (Ours)

Structured Skill Package

Metadata-based Retrieval

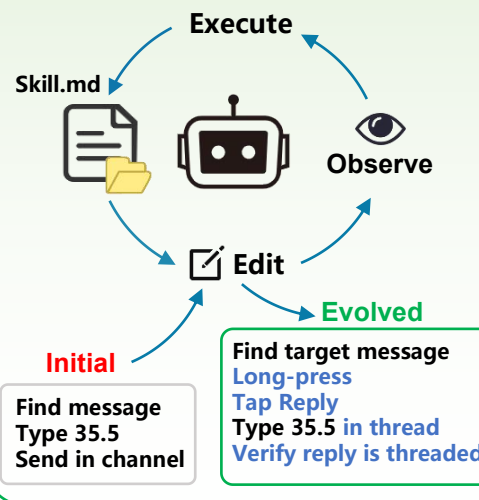

Plan: Long-press target - Reply - Type 35.5 - Verify thread

Backup: Alternate controls for Reply / 3-dot menu

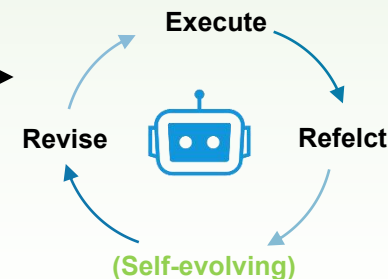

Recover: if no 'Replying to...' indicator, abort and retry

Failure: Records "posted standalone message" case

In-rollout Revision

Single-backbone Self-evolution

Our Advantages

- ✓ Structured, editable skill package
- ✓ Single-backbone self-evolution
- ✓ In-the-loop revision enables instant edits
- ✓ Structured metadata retrieval improves matching
